March 16, 2021

Greetings,

Our church is badly in need of additional storage facilities. We are currently renting space to store all the festival equipment and all of our storage closets in the building are full.

What follows are drawings showing a proposed storage building with solar cells on the roof. A parishioner has donated a significant amount of money that can be used for this project. Some fund raising would still be required to complete the project.

The storage building would be located behind the social hall next to the existing playground and garden. This location is the best for physical access as well as proximity to our existing electrical service. The solar cells will need to be tied into our existing electrical service.

Cost savings to the church from elimination of storage fees and reduced energy costs will be in the $6,000 to $8,000 range per year.

It is my hope to get approval for this project from the Parish at the Spring General Assembly meeting scheduled for April 11, 2021.

If you have comments or questions, please email me at presidentstnickaa@gmail.com. You can also call me between the 9’s., 9:00 a.m. to 9:00 p.m. My cell number is 517-782-6101.

Thank you for your commitment to our Parish Family.
